

Minutes of Meeting (MoM)

Meeting Date: January 26, 2026

Meeting Title: Initial Project Discussion

Team Members:

Kumar Mantha, 1002233682

Vandit Goel, 1002245699

Pratyaksh Mathur, 1002228261

Agenda

- Introductions
- Initial problem statement discussion
- Clarifications and questions

Discussion Topics

- The objective is to **predict gas usage** using historical usage data from **two facilities**.
- There may be a need to **augment the dataset with additional features**, such as climate or weather-related data.
- The **current approach** relies on historical **average monthly usage**.
- **Future scope** includes exploring **tariff optimization**.
- Penalties are incurred for both **under-usage and over-usage**, making accurate prediction critical.

Action Items

- Set up **weekly or bi-weekly stand-up meetings**.
- **Familiarize with the dataset** and its structure.
- **Parse and preprocess the Excel file**.
- Perform **initial Exploratory Data Analysis (EDA)** to identify patterns and relationships.

Status Report

- Set up stand-up meetings (Will ask every week for client's availability).
- Familiarize with the dataset and its structure.
- Parse and preprocess the Excel file.
- Perform initial Exploratory Data Analysis (EDA) to identify patterns and relationships(**In Progress**).

Open Questions

- Clarification needed on **dataset fields**, specifically *Nom* and *Delivery*.
- Reason for having **two separate columns for Usage** (e.g., "Usage 1" and "Usage 2").
