

Weekly Report

Project title: Scott Forge Project

Date: 2/13/2026

Team members:

Name: Kumar Mantha Student ID: 1002233682

Name: Vandit Goel Student ID: 1002245699

Name: Pratyaksh Mathur Student ID: 1002228261

Progress report:

- Correlation analysis of lags with usage. (Vandit)
- Trend analysis using Excel on historical data. (Pratyaksh)
- Base line model with MoM and YoY data. (Pratyaksh)
- Base line model with positive correlation lags. (Vandit)
- Ensemble base line model with weighted decision. (Kumar)
- Comparative analysis with SARIMAX model. (Kumar)
- Working on fine tuning baseline models and starting on advanced models. (Vandit, Kumar and Pratyaksh)

Did you encounter any obstacles in the last week? How did you overcome it?

This week, while forecasting gas usage, all three team members initially took different approaches. We organized a short team review to compare approaches side by side. Evaluated the performance of each method on historical back testing data (MAE, MSE, RMSE).

Due to time constraints, we were unable to hold this week's discussion with Mr. Fass. We will schedule the meeting for the upcoming week.
